

JACKSON CREEK GREENWAY

PROJECT OVERVIEW

CONNECTING COMMUNITIES

Richland County is planning the Jackson Creek Greenway— a proposed 1.3-mile paved multi-use path designed to connect local neighborhoods, schools, and community spaces.

The trail will run from North Trenholm Road Extension to Trenholm Road near Decker Boulevard, following the natural path of Jackson Creek.

Key design features of the proposed greenway include:

Paved Multi-use Path

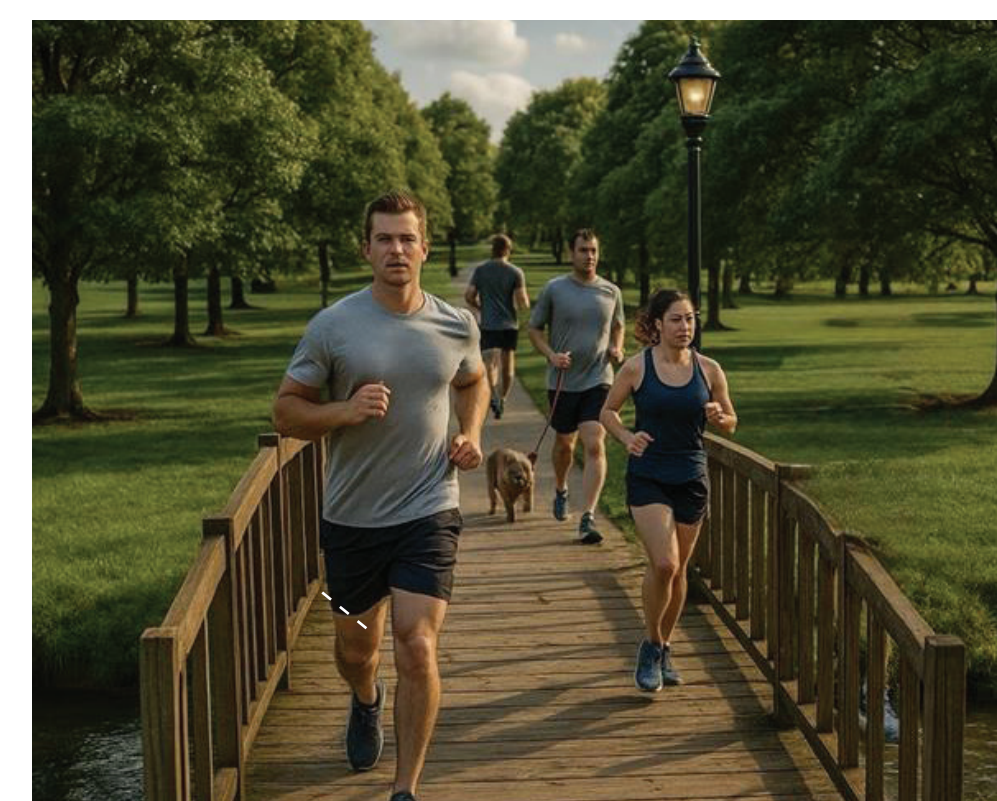

Elevated Boardwalks
to protect wetlands & flood-prone areas

Park Benches
for rest and scenic views

Marked Crosswalks
at key intersections

Pedestrian Bridges
for safe creek crossings

WHAT'S A GREENWAY?

A **greenway** is a dedicated, often scenic pathway designed for non-motorized use such as walking, biking, and jogging. It typically runs through natural areas or alongside creeks, parks, and urban neighborhoods, providing a safe and pleasant route for recreation and transportation.

COMMUNITY BENEFITS:

- Provides a safe and scenic route for walking, jogging, and biking
- Improves access to neighborhoods, parks, schools, and commercial areas
- Supports sustainable, active transportation
- Enhances the County's green infrastructure network
- Promotes health, recreation, and community connectivity
