

JACKSON CREEK GREENWAY

PROPOSED GREENWAY ALTERNATIVES: ROUTE A/B

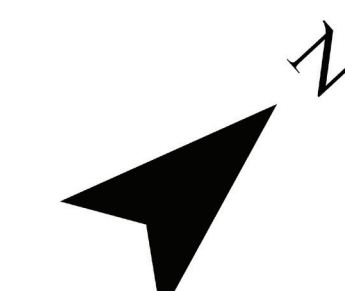

Exploring Future Connections: Proposed Greenway Alternatives

This exhibit presents two potential routes for a future greenway trail designed to enhance connectivity, recreation, and environmental access for our community.

- The **Red Route** proposes a more direct connection through the area, offering quicker access between key destinations.
- The **Green Route** takes a more scenic path.

Both routes aim to **balance** transportation, recreation, and conservation goals while minimizing impacts to surrounding properties. The shaded parcels on the map represent areas that may be affected by the proposed alignments and are currently under review for feasibility, access, and environmental considerations.

We invite your input!
Your feedback helps shape a greenway that reflects the community's values, priorities, and vision for the future.
