### **BIKEWAY PROGRAM – ROAD DIETS**

Project 785 | Districts 2, 4, 5

#### **SCOPE**

Road Diets are projects where a four-lane road is restriped to create a two-lane road with a center turn lane; and sharrows, where vehicle and bike traffic share the road when there is not enough room for a bike lane. Originally, this project had six identified roads, but two were removed due to safety concerns and coordination with USC's bikeway planning program.
